*1st International Symposium on*  
**MERKEL CELL CARCINOMA**

**Monday and Tuesday, October 21-22, 2019 | Moffitt Cancer Center, Tampa, Florida**

**COURSE DIRECTORS** Kenneth Y. Tsai, MD, PhD and Vernon K. Sondak, MD

**COURSE DESCRIPTION** The International Symposium on Merkel Cell Carcinoma is a first-of-its-kind educational program of thought leaders and active investigators in Merkel cell carcinoma (MCC) brought together for the purpose of promoting scientific discourse and collaboration toward the goal of improved understanding of MCC biology, pathogenesis and therapy. The areas of focus will span the entire range of basic science to translational studies to clinical trials. The format will include several sessions with talks and abstract presentations emphasizing new, unpublished work throughout the two-day symposium. Roundtable discussions will be centered on pressing questions in the field including how best to address the role of radiation therapy, immunotherapy resistance, and the future of molecularly-targeted and orthogonal immunotherapeutic approaches. Abstract submissions will be accepted shortly.

**TARGET AUDIENCE** This program is designed for oncologists, dermatologists, pathologists, other healthcare professionals, and scientists interested in Merkel cell carcinoma.
